VOYAGES & TOURISME · BATNA 05

Beginner's guide

Step by step, from your first day

دليل المبتدئين — خطوة بخطوة

Written for

New team members. No experience needed.

Version

1.0 · 13 November 2026

Practice lessons use sample (DEMO) data.

Welcome

This guide teaches you the system one small lesson at a time. You do not need any experience. Do the lessons in order, and do the **practice exercises** — they take about 5 minutes each.

1 The big idea in 2 minutes

2 Lesson 1 — Open the system and sign in

3 Lesson 2 — Know your screen

4 Lesson 3 — A customer arrives (the lead)

5 Lesson 4 — Answer the customer

6 Lesson 5 — Save what you learn

7 Lesson 6 — Stages: where is the customer?

8 Lesson 7 — Follow-up and call back: when, and how

9 Lesson 8 — Your follow-up list every day

10 Lesson 9 — The customer says yes: booking

11 Lesson 10 — Payments and travel documents

12 Lesson 11 — Customers from the website

13 Your day in 10 steps

14 Mistakes everyone makes

15 Quick card and mini quiz

Practice safely

Ask your administrator to switch on **sample data**. Sample customers, packages and bookings carry a DEMO badge. You cannot harm anything real while you practise, and nobody is contacted.

One thing to remember from the very start

The system **shows you** customers and **reminds you** to act. It does **not send WhatsApp messages**. You always reply from the **WhatsApp Business app** on the agency phone (or press **Open WhatsApp** in the system). The system will also **not** create a reminder for you — you create it. Lesson 7 explains this fully.

START HERE

1 The big idea in 2 minutes

Think of the system as a **notebook that fills itself**. Every person who writes to YourTour gets one page in the notebook. That page is called a **lead**.

1
Customer writes
On WhatsApp or the website form.

→

2
A page appears
Name, number and message are filled in for you.

→

3
You answer
From the WhatsApp Business app.

→

4
You write notes
Trip wishes, budget, what was agreed.

→

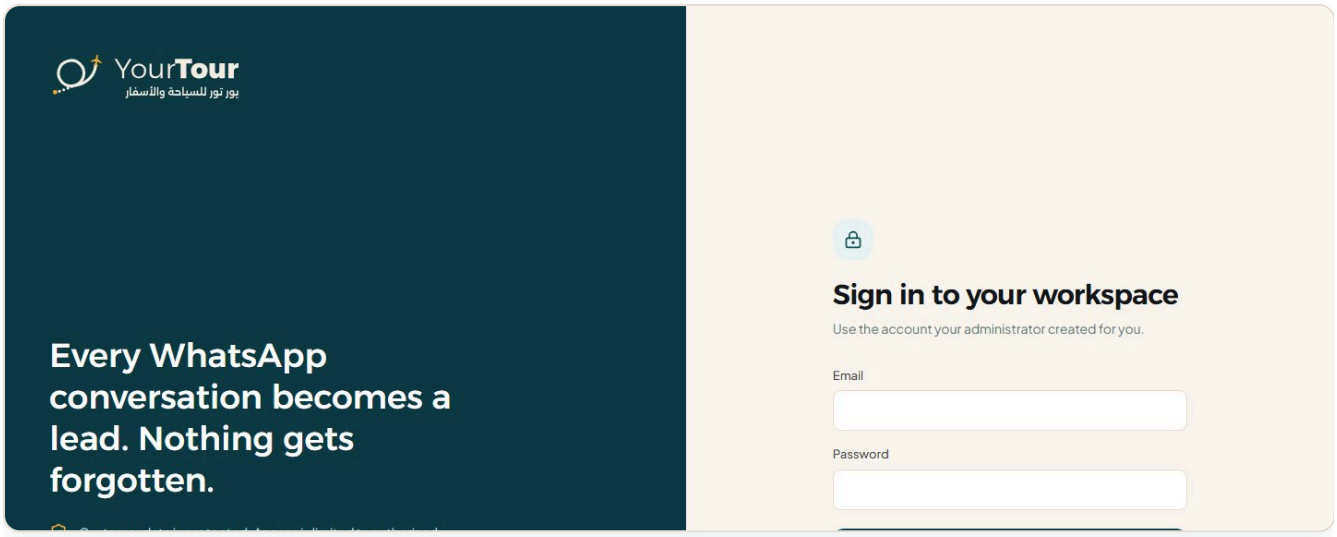

5
You set a reminder
So the customer is never forgotten.

Five words to learn

Lead	One customer page. One page per phone number. Everything about the customer is on it.
Stage	Where the customer is: just arrived, in talks, confirmed, travelled… Like a train line with stations.
Follow-up	A reminder you set: "contact this customer on this day at this hour".
Package	A trip we sell (for example Umrah 15 days).
Booking	A customer who said yes and reserved places.

LESSON 1 · 3 MINUTES

2 Open the system and sign in

The sign-in page.

1. Open the browser (Chrome) on the agency computer.
2. Type the system address and add `/admin` at the end. Today it is `http://localhost:5173/admin`. After the system goes online it will be your own web address. Save it as a **bookmark**.
3. Type your **email** and your **password**. Your administrator gave them to you.
4. Press **Sign in**.
5. First time only: click your **name** (top right) → **Change password**. Choose a password only you know, at least 10 characters.

Choose your language

Click the little translate icon (文A) at the top. Pick English, Français or العربية. In Arabic the whole screen turns right-to-left.

Never share your password

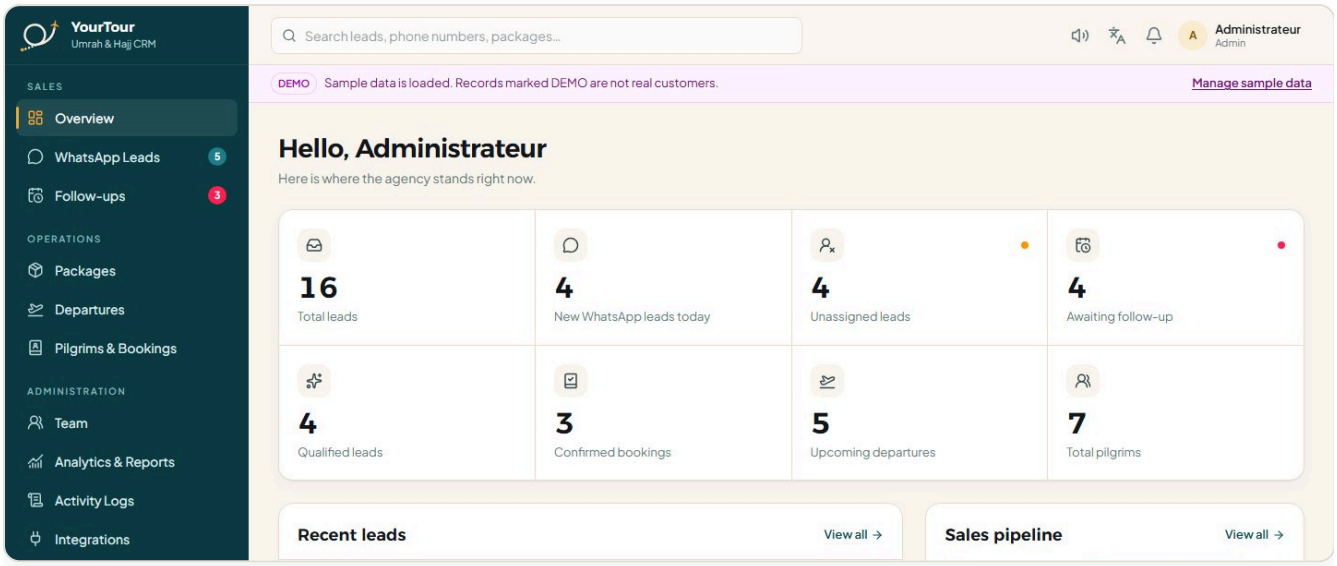

Everything you do is recorded with your name. If someone else uses your account, their mistakes are written under your name. If you forget your password, ask the administrator to reset it.

Exercise 1

- [ ] Sign in.
- [ ] Change your password.
- [ ] Switch the language to French, then back.
- [ ] Sign out (name → **Sign out**) and sign in again.

LESSON 2 · 5 MINUTES

3 Know your screen

The Overview. This is the first page after you sign in.

You only need to know three areas:

1 · The menu (left, dark green)

Your pages. The pages you use most are **WhatsApp Leads** and **Follow-ups**. A number on WhatsApp Leads = customers with messages you have not read. A red number on Follow-ups = reminders that are late.

2 · The top bar

Search (find a customer by name or number), the speaker (sound on/off), the bell (what is new), and your name.

3 · The middle

The page you opened. The Overview shows 8 numbers. Click any number to see the customers behind it.

The green light

At the bottom of the menu you see **Live** with a green dot. Green = new customers appear by themselves, without refreshing. If you see **Reconnecting…** (orange), check the internet.

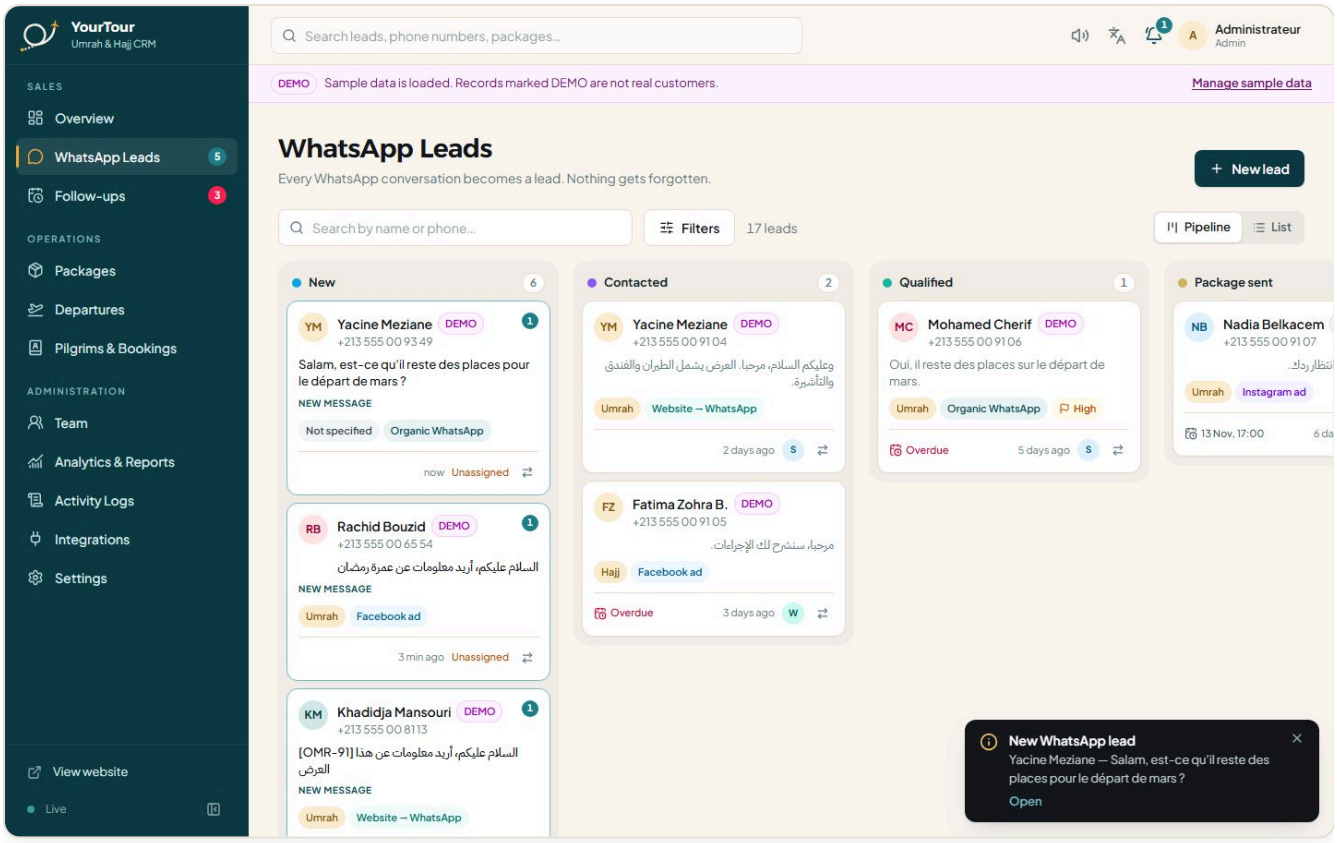

Exercise 2

- [ ] Click each item in the menu once and look at it.
- [ ] Click the speaker icon: do you see it change?
- [ ] Use Search to find a customer by typing two letters.

LESSON 3 · 5 MINUTES

4 A customer arrives — the lead

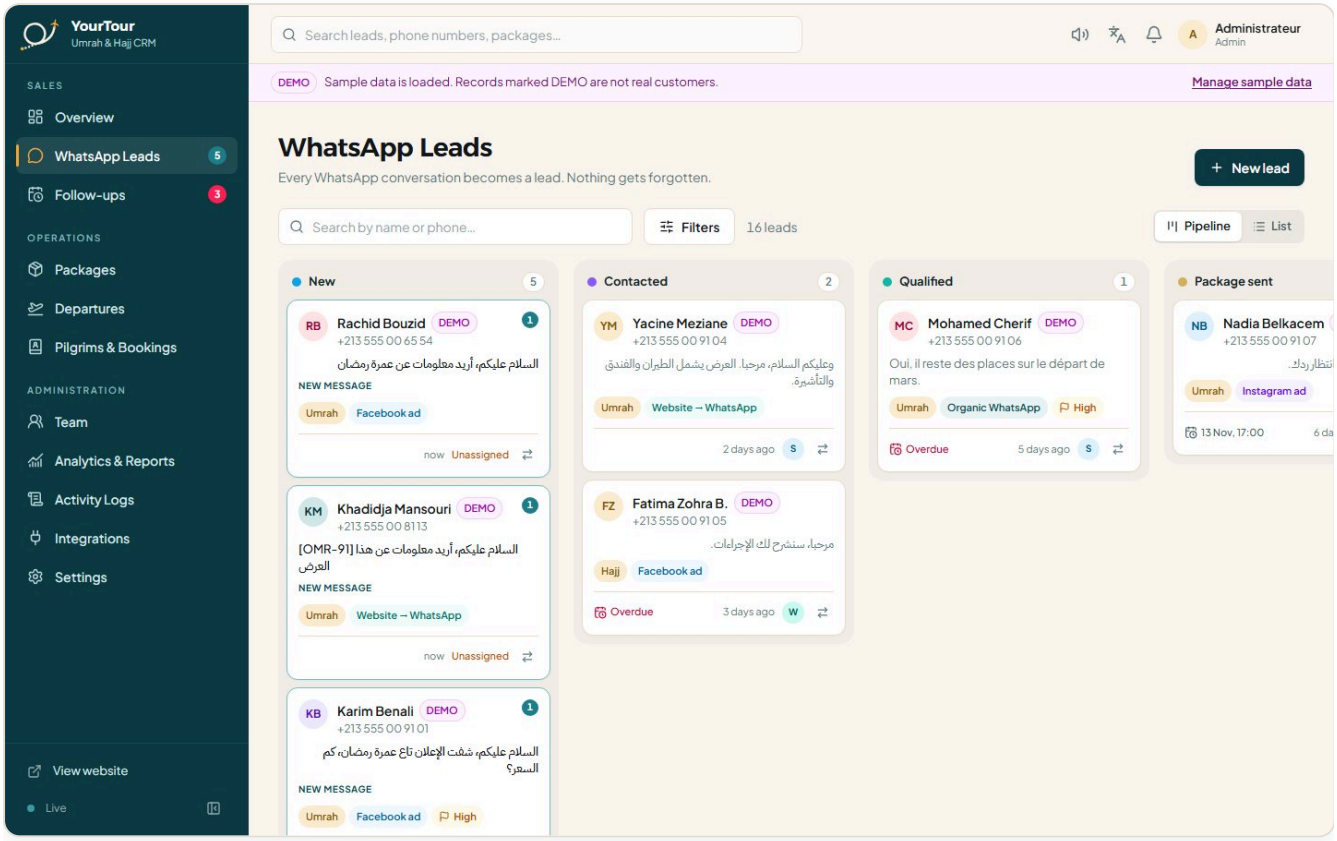

Keep the dashboard open during work. When a customer writes on WhatsApp, three things happen by themselves.

A new customer. A card appears, a message pops up at the bottom, and you hear a short chime.

1. A new **card** appears at the top of the first column, **New**.
2. You hear a **chime** (if the sound is on) and see a pop-up with an **Open** button.
3. The tab title of the browser shows a number, for example **(3)**, even if you are on another tab.

How to read the card

WhatsApp Leads. Open this page and look at the first column.

Name and number	Filled in for you from WhatsApp. If the customer has no profile name you see only the number.
Green number + NEW MESSAGE	Unread messages. Green border = needs an answer.
Message text	The last thing written.
Small tags	Umrah or Hajj, and where the customer came from (a Facebook ad, the website, or "Organic WhatsApp" = they just wrote to us).
"Unassigned"	No employee owns this customer yet. A manager gives it to someone (Lesson 5).

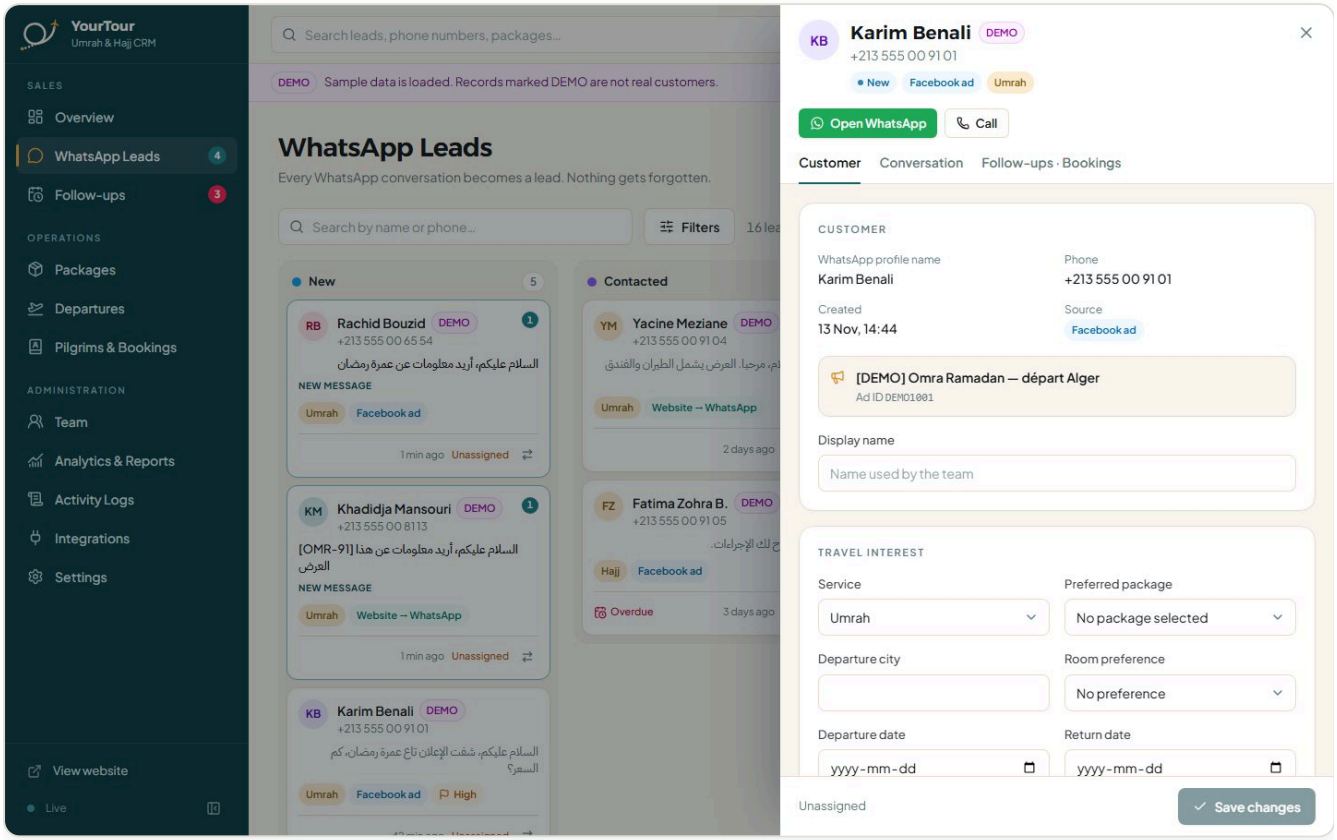

Exercise 3 (ask your administrator to help the first time)

Open **Integrations** → **Demo & testing** → press **First message from a new customer**. Open **WhatsApp Leads** in another tab. Did a card appear and did you hear the chime?

LESSON 4 · 5 MINUTES

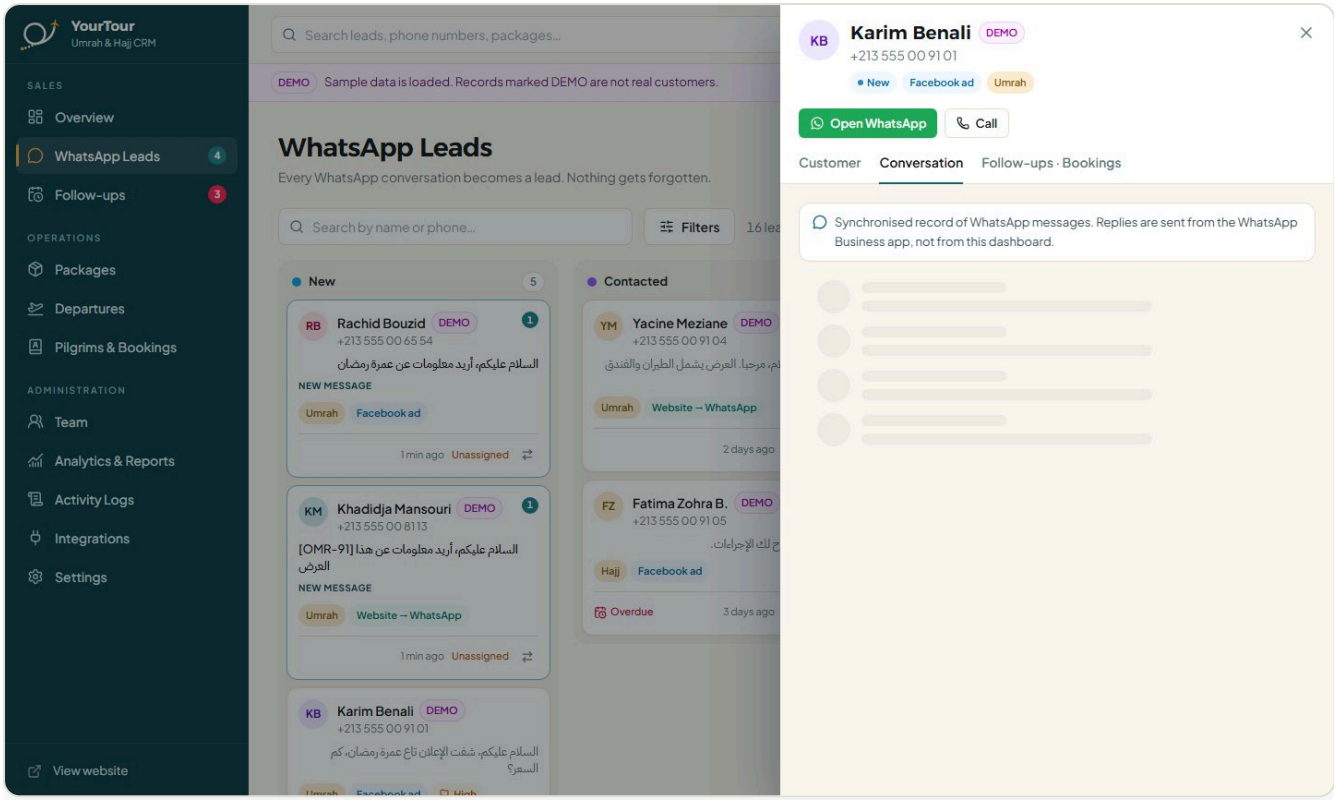

5 Answer the customer

Speed matters. A customer who waits an hour often writes to another agency.

Click a card and the customer's panel opens on the right.

1. **Click the card.** The panel opens.
2. Click the tab **Conversation** to read the messages. This also marks them as read.
3. Press the green button **Open WhatsApp**. The chat opens (WhatsApp Web or the phone).
4. **Write your reply there** — not in the system.
5. Come back to the system for the next lesson: save what you learned.

Conversation tab. Customer messages on one side, agency replies on the other.

> **Why can't I reply inside the system?**
>
> The agency keeps using the WhatsApp Business app. The system keeps a **copy** of the conversation so nothing is lost and the whole team sees it. Replies you send from the app appear in the Conversation tab too, once WhatsApp is connected.

Who owns the customer?

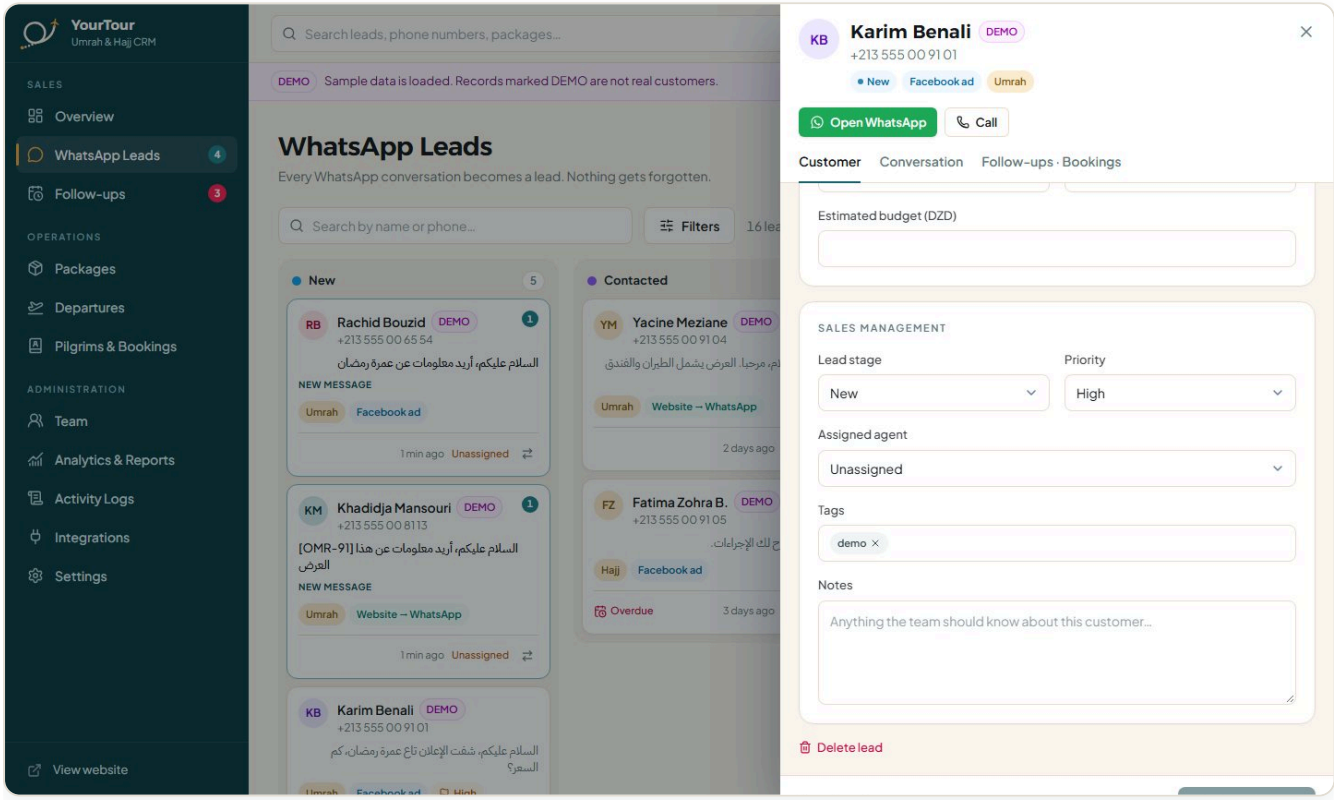

If the card says **Unassigned**: a **manager** opens the card and chooses an employee in **Assigned agent** (bottom of the first tab), then presses **Save changes**. An **agent** sees only customers assigned to them. If your list is empty, nobody has assigned you customers yet — ask your manager.

LESSON 5 · 5 MINUTES

6 Save what you learn

After you talked to the customer, write down the important things on their page. Next week you will not remember; the page will.

1. Open the customer. Click the first tab, **Customer**.
2. **Display name** — type the name you want to use (for example "Mme Benali"). WhatsApp will never overwrite it.
3. **Travel interest** — choose Umrah or Hajj, the package they like, dates, number of adults and children, and the budget.
4. Scroll down to **Sales management**: choose the **stage** (Lesson 6) and write **notes**: "wants December, 4 people, asked about payment in two parts".
5. Press **Save changes** at the bottom right. The bar at the bottom says **Unsaved changes** until you do.

Sales management. Stage, priority, agent, tags and notes.

Do not type passport numbers or ID numbers

Not in notes, not anywhere. Write only "passport received" or "photos missing". Keep the original documents in the agency's secure file.

Exercise 4

Open a sample customer. Set a display name, choose Umrah, set 2 adults, write a note, and press **Save changes**. Close the panel and open it again: is everything still there?

LESSON 6 · 6 MINUTES

7 Stages: where is the customer?

Every customer is at one **stage**. Moving the card to the next stage shows the whole team how far the customer has come.

Stage	Move the card here when…	Then do
New	(automatic) The customer just wrote.	Answer within minutes.
Contacted	You answered the customer.	Ask: Umrah or Hajj? When? How many people?
Qualified	It is a real project: dates and people known.	Choose a package for them.
Package sent	You sent the offer.	**Set a follow-up** to get their answer.
Awaiting documents	They said yes; you wait for papers.	Follow-up to collect passports and photos.
Awaiting deposit	You wait for the deposit.	Follow-up to confirm payment.
Confirmed	The deposit is received. It is sold.	Create the **booking** (Lesson 9).
Travel preparation	Visa and final preparation.	Tick each document step.
Completed	The trip happened.	Thank them; keep in touch.
Lost	They will not travel with us.	Type the reason (price, dates, booked elsewhere).

Three ways to move a card

- **Drag** the card with the mouse into another column.
- Click the small ⇄ icon at the bottom right of the card and choose the stage (easiest on a phone).
- Change **Lead stage** in the customer's panel and press **Save changes**.

> **What moves by itself**
>
> Only one thing: when the agency replies from the WhatsApp Business app to a customer at **New**, the card goes to **Contacted** and the unread number clears. **Everything else is your decision.**

8 Follow-up and call back: when, and how

A follow-up is a reminder that YOU create. The system never creates one by itself.

A follow-up says: *"on this day, at this time, contact this customer, for this reason."* The system then puts it in your list, turns it red when it is late, and counts it on the Overview.

When does a customer become a follow-up?

Ask yourself one question at the end of **every** contact with a customer:

"What is the next step, and is it later than today?" → If yes, set a follow-up before you close the panel.

Situation	Reason to choose	When to set it
The customer says *"call me tomorrow / next week"*	**Call back**	The exact day and hour they asked.
You sent a package and wait for the answer	**Send offer**	In 1–2 days. Ask "did you see the offer?"
The customer said yes, papers are missing	**Documents**	In 2–3 days, or before the deadline.
You wait for the deposit	**Deposit**	On the day they promised to pay.
The customer is "thinking about it"	**Other** (note: "thinking")	In 3–5 days.
The customer does not answer	**Call back**	Try again the next day, then in 3 days. After that, move to *Lost* with the reason "no answer".
The customer is ready and everything is done	—	No follow-up needed. Create the booking.

A customer without a follow-up can be forgotten

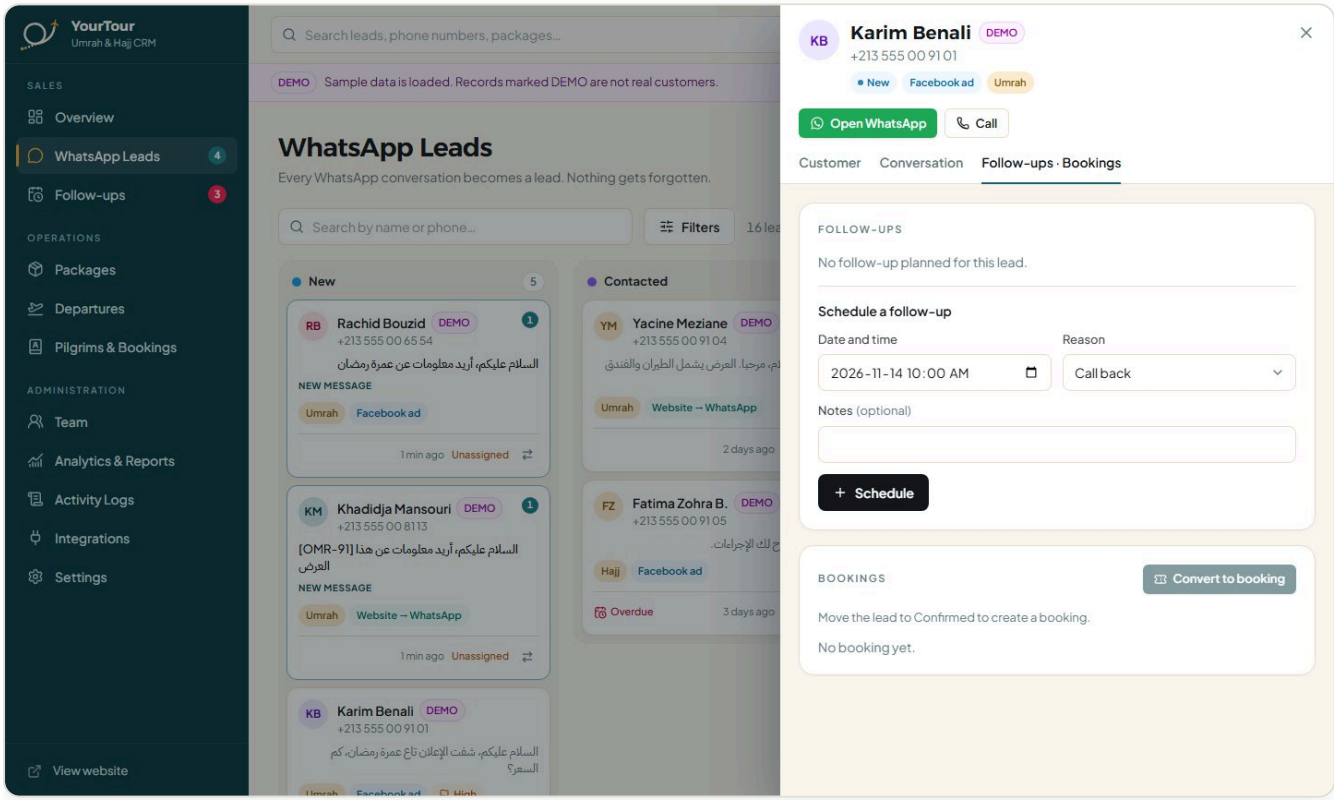

If a customer is in a stage like *Contacted* or *Package sent* and has **no reminder**, nobody will remind you. That is exactly how customers are lost. A card with a follow-up date shows a small calendar at its bottom. No calendar = no safety net.

"Call back" — three different meanings

Meaning	What the system does by itself	What you do
1. The customer asks to be called (call-back form on the website)	Creates a **lead** with source **Website form**, with their name, number and message. Rings the chime. It does not create a follow-up.	Call them as soon as you can. If you cannot reach them, set a follow-up (reason **Call back**).
2. The customer says "call me later" (on WhatsApp or phone)	Nothing. The system cannot understand the message.	Set a follow-up for the time they gave, reason **Call back**.
3. You promise to call back	Nothing.	Set a follow-up so you do not forget your own promise.

The same logic applies to every kind of reminder: **the system keeps your promises only if you write them down** as a follow-up.

How to set a follow-up — step by step

Follow-ups · Bookings tab. This is where you create a reminder.

1. Open the customer (click the card).
2. Click the third tab, **Follow-ups · Bookings**.
3. Under **Schedule a follow-up**, choose the **date and time**. The system proposes tomorrow at 10:00 — change it if needed.
4. Choose the **reason**: Call back, Send offer, Documents, Deposit or Other.

5. Write a short **note** for your future self: "Ask if she saw the 15-day offer".
6. Press **Schedule**. The reminder appears in the list above the form.

What happens next

The reminder is **assigned to the customer's agent**. On the card, the next date appears next to a small calendar. On the due day it shows in **Follow-ups** under **Today**. If you miss it, it turns **red** under **Overdue**, the menu shows a red number, and the Overview counts the customer under *Awaiting follow-up*.

When does a follow-up end?

- **You did it:** press **Mark completed**. (Then set the *next* follow-up if the customer is not finished!)
- **The date changed:** press **Reschedule** and choose Tomorrow, In 3 days, Next week, or an exact date.
- **You pressed it by mistake:** press **Reopen**.
- **The customer is Confirmed or Lost:** complete or leave the old reminders; they no longer matter.

The chain

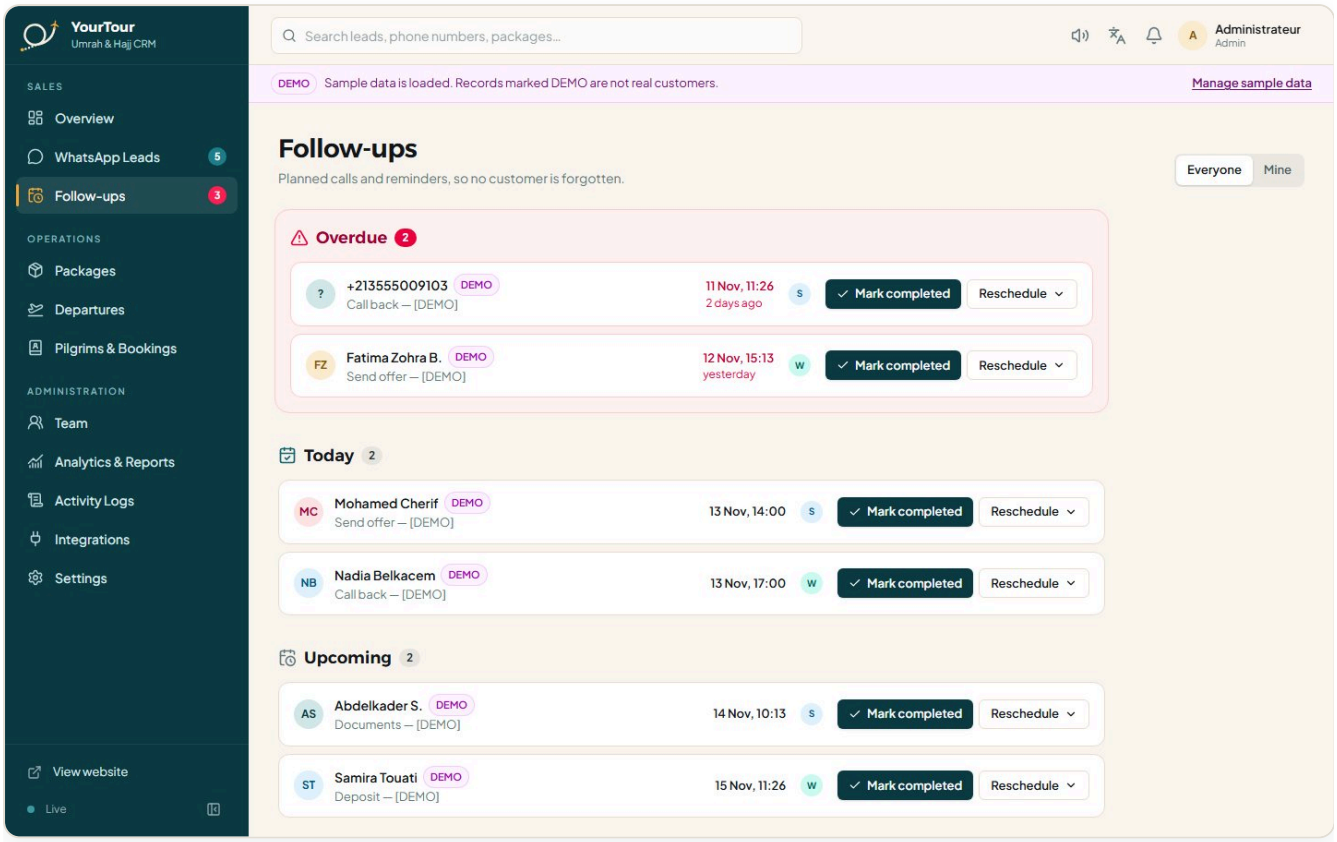

A sale is a chain of follow-ups: contact → follow-up → offer → follow-up → documents → follow-up → deposit → **booking**. Every time you finish one link, **create the next one**.

Exercise 5

1. Open a sample customer.
2. Imagine she said "call me Thursday at 4 pm". Set a follow-up for that time with the reason **Call back**.
3. Look at her card: do you see the small calendar and date?
4. Open **Follow-ups**: is her reminder in the list?
5. Press **Reschedule** → *Tomorrow*. Then press **Mark completed**.

LESSON 8 · 4 MINUTES

9 Your follow-up list every day

The Follow-ups page. Late reminders first, in red.

Open **Follow-ups** in the menu. You see four groups:

Overdue	The time has passed. **Do these first.** They sit in a red frame.
Today	Due today. Go through them from the top.
Upcoming	Later. Nothing to do yet.
Completed	Click the heading to see what you have done.

For each reminder

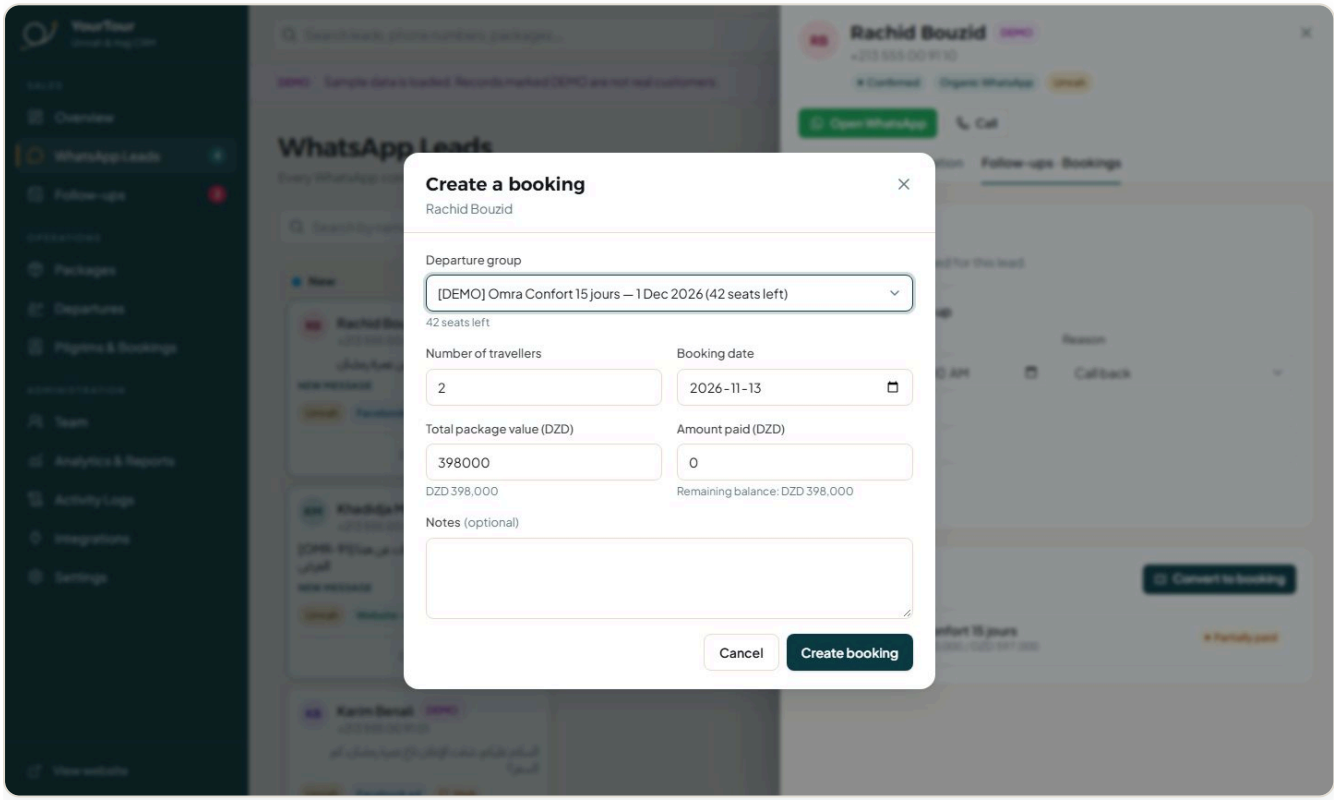

1. Click the customer's **name** to open their page and read your note.
2. Contact them (**Open WhatsApp** or **Call**).
3. Write what happened in the notes. Move the stage if needed.
4. Press **Mark completed** — and **set the next follow-up**.

> **Goal for the end of every day**
>
> **Overdue = 0.** Every open customer has a future follow-up date.

LESSON 9 · 6 MINUTES

10 The customer says yes: booking

1. Move the customer to **Confirmed** when the deposit is received. Until then the booking button stays grey.
2. Open the customer → tab **Follow-ups · Bookings** → **Convert to booking**.
3. Choose the **departure** (date). Only departures with free places are listed.
4. Enter the **number of travellers** and the **booking date**.
5. Check the **total price** (the system suggests it; change it only if you agreed another price).
6. Type what the customer has **already paid**. The remaining balance shows below.
7. Press **Create booking**.

Create a booking.

The system now saves the booking, creates one **traveller record per person**, and takes the places from the departure (the website shows the new number of places left).

Exercise 6

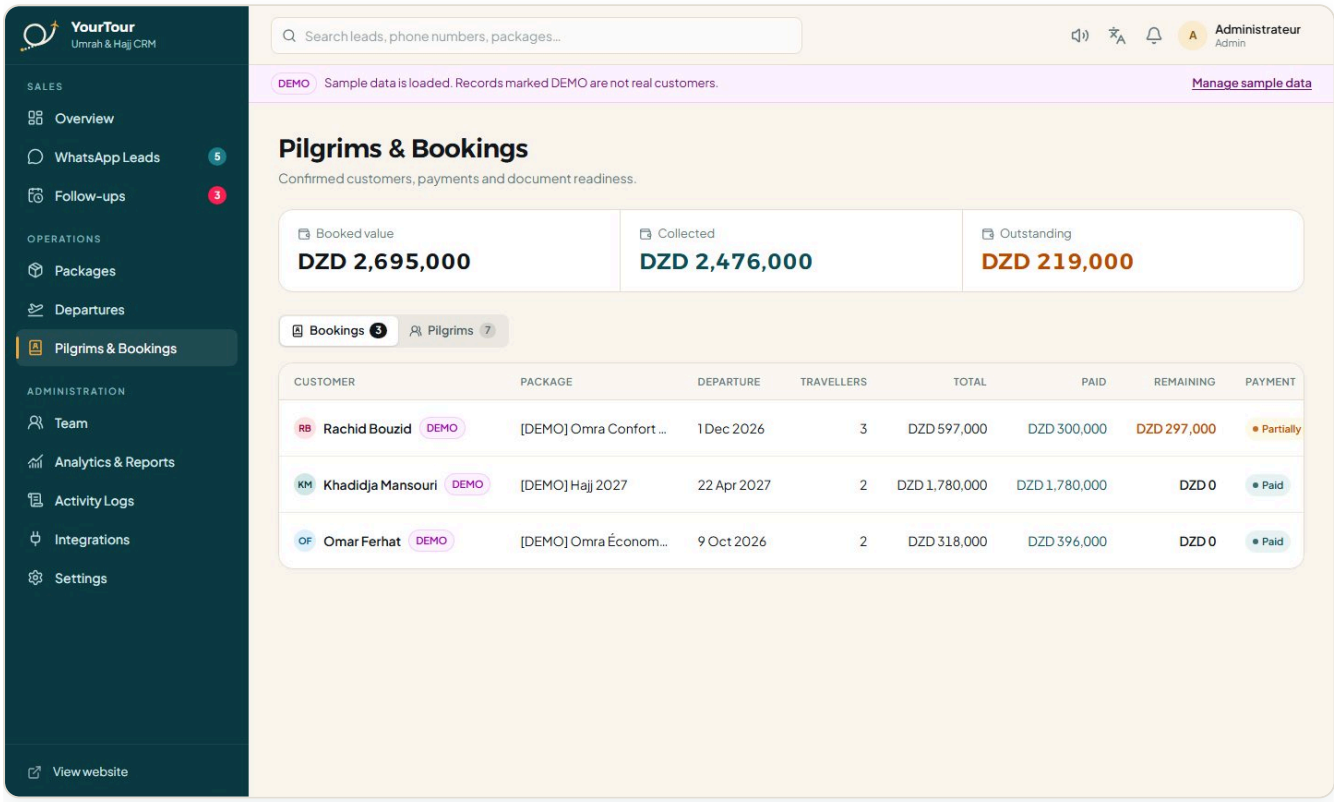

Move a sample customer to Confirmed, then create a booking for 2 travellers with part of the price paid. Open **Pilgrims & Bookings**: do you see it?

LESSON 10 · 5 MINUTES

11 Payments and travel documents

Record a payment

1. Menu → **Pilgrims & Bookings** → tab **Bookings**.
2. Click the **pencil** at the end of the booking's row.
3. Change **Amount paid** to the new total received (not just the new payment). Keep *Payment* on **Automatic**.
4. Press **Save changes**. The label becomes Unpaid, Partially paid or Paid by itself.

Bookings. Total, paid and remaining for each customer.

Track the documents

1. Same page, tab **Pilgrims**. One line per traveller.
2. Click each step when you receive it: passport, photos, documents. It turns green with a tick.
3. Click the visa label to change it: not started → in progress → submitted → approved.
4. The bar fills up and says **Ready** when everything is complete.

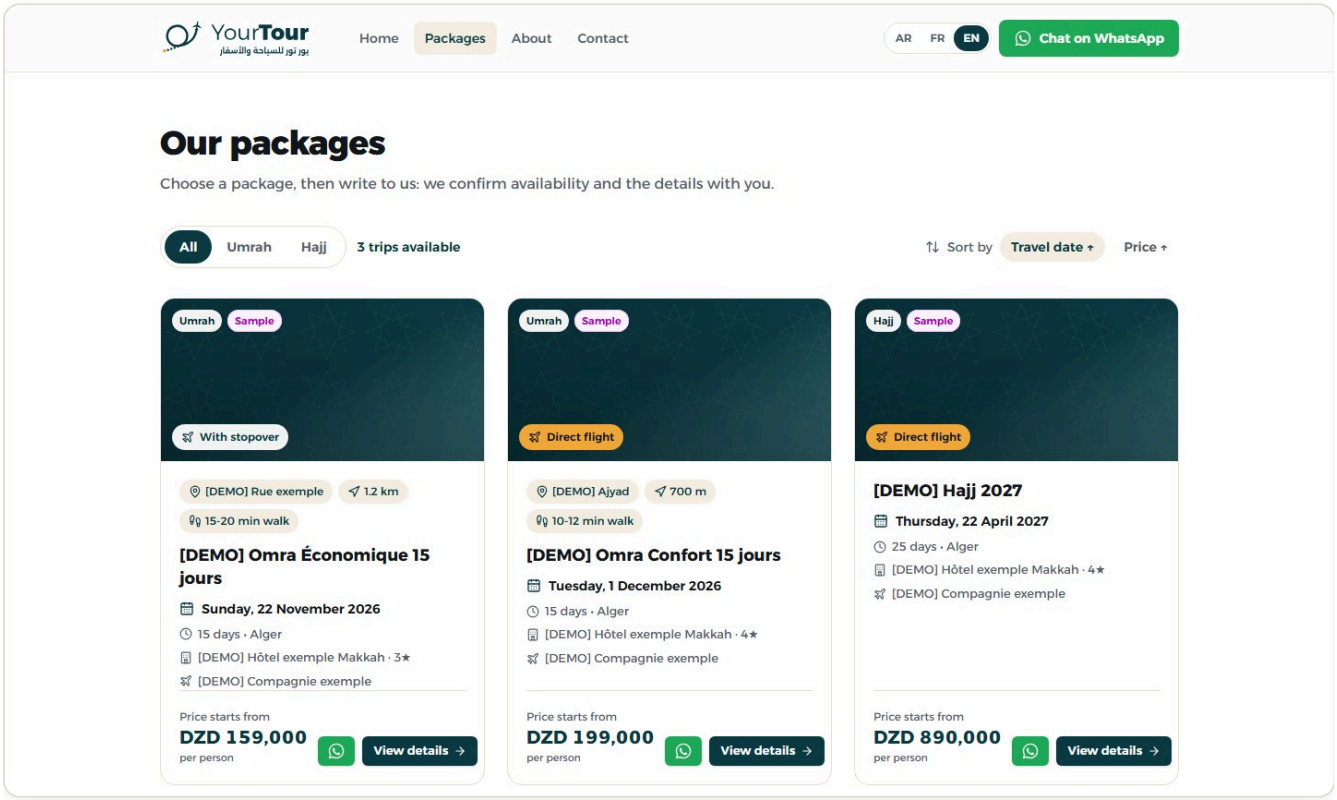

You can click a traveller's name to type the real name (the system starts with the customer's name plus 1, 2, 3...).

LESSON 11 · 4 MINUTES

12 Customers from the website

Customers can also come from the website, in two ways. Both end up as a lead in **WhatsApp Leads**.

How they came	What you see	What you do
They pressed a WhatsApp button on a package	Source **Website → WhatsApp**. Their first message starts with a code like `[OMR-01]`. The package is already chosen for you.	Reply on WhatsApp like any customer.
They filled in the call-back form	Source **Website form**. The message shows what they typed (adults, children, question).	Call them. That is what they asked for. Then follow Lesson 7.

The website. This is what customers see before they write to us.

> **The same customer, twice**
>
> If the same phone number writes again (on WhatsApp or the form), the system adds it to the **same page**. You never get two pages for one number. Everything you typed stays.

PUT IT TOGETHER

13 Your day in 10 steps

1. **Sign in** and keep the dashboard open in a tab. Check the sound is on.
2. Open **Follow-ups**. Do every **Overdue** one, then **Today**.
3. Open **WhatsApp Leads**. Find cards with a **green number**.
4. For each one: read the Conversation, press **Open WhatsApp**, reply.
5. Come back: fill in the details, add a note, choose the stage, **Save changes**.
6. **Set the next follow-up** for every customer who is not finished.
7. When a customer pays the deposit: **Confirmed** → booking.
8. Record payments received today. Tick documents received today.
9. Check the end-of-day goals: **Overdue = 0**, no unread green numbers, no open customer without a follow-up date.
10. **Sign out** on a shared computer.

LEARN FROM OTHERS

14 Mistakes everyone makes

The mistake	The fix
Replying and forgetting to set a follow-up.	Make it a habit: *answer → note → follow-up → save*.
Changing something and closing the panel without pressing Save changes.	Watch the bottom bar. "Unsaved changes" means not saved yet.
Looking for the reply box in the system.	Replies go from the WhatsApp Business app. Use **Open WhatsApp**.
Creating a manual lead for a customer who wrote on WhatsApp.	Do not. It already exists. Use **New lead** only for people who visit or phone.
Marking Lost without a reason.	The system asks for it. Be honest: it helps the agency improve.
Leaving customers in New for hours.	Reply quickly. Once you reply from the app, the card moves by itself.
Typing passport numbers in notes.	Never. Only write "received" or "missing".
Setting the "amount paid" as only the last payment.	It is the **total received so far**.
Sharing your password to "help a colleague".	Ask the administrator for an account for them.
Not seeing a customer a colleague mentioned.	It is assigned to someone else. Ask a manager to assign it to you.

KEEP THIS PAGE

15 Quick card and mini quiz

The 5 rules

1. Answer fast, from the WhatsApp Business app.
2. Write notes on the customer's page, then Save.
3. Keep the stage up to date.
4. **Every open customer needs a follow-up date.**
5. Overdue = 0 at the end of the day.

Where is…

- New customers → **WhatsApp Leads**
- My reminders → **Follow-ups**
- Payments and documents → **Pilgrims & Bookings**
- Trips and prices → **Packages**, **Departures**
- Who did what → **Activity Logs**

Mini quiz (answers below)

1. A customer writes on WhatsApp. Does the system create a follow-up? *(yes / no)*
2. A customer fills in the website call-back form. What does the system create?
3. She says "call me Monday at 11". What do you do?
4. After sending an offer, what should you set?
5. Where do you reply to a customer?
6. What does a red number next to Follow-ups mean?
7. When can you press **Convert to booking**?
8. Can you type a passport number in the notes?

Answers

1 No — you create it. **2** A lead with source "Website form" (no follow-up). **3** Set a follow-up for Monday 11:00, reason "Call back". **4** A follow-up in 1–2 days (reason "Send offer"). **5** In the WhatsApp Business app (**Open WhatsApp**). **6** Reminders are late. **7** After the customer is at Confirmed. **8** No, never.

YourTour · يور تور للسياحة والأسفار — Beginner's guide v1.0. For the complete reference of every screen, see the full User guide.
